# Lowthorpe

## GROTON, MASSACHUSETTS

Lowthorpe is the oldest school of Landscape Architecture for women in the country and since its foundation in 1901 the gardens have served as a laboratory wherein the students consider the idiosyncracies of growing plants and master the technique of their culture. This calls for the cultivation of the unusual as well as of that which is familiar to appreciative gardeners and the training in methods of propagation creates, as a by-product, surplus stock which, in past years, has added to the beauty of many a garden designed by our graduates. Present conditions permit us to offer an equal opportunity to a wider circle of those who also enjoy the allure of the unfamiliar.

Visitors are welcome thruout the season but, owing to the requirements of the School, we reserve the right to refuse service during class hours and we request prospective customers to plan their visits for Tuesdays, Thursdays, and Saturdays between the hours of 2 and 5 P. M.

All orders subject to stock on hand.

10% discount on orders of over \$20.00 or to landscape architects.

### PLANTS FOR THE ROCK GARDEN

<i>Aethionema</i> hybrids; Like a pink-flowered Candytuft; 8 in.	\$.40
